

Atalaya Riotinto Minera is a Spanish company belonging to the Atalaya Mining group, dedicated to the extraction and processing of minerals to produce copper concentrate at the historic Riotinto deposit in the Cuenca Minera area of Huelva

ENERGY POLICY

The management of Atalaya Riotinto Minera is aware of the need to produce copper concentrate within an energy-efficient process. The company therefore works continuously to improve its energy performance in accordance with this Policy, the basic principles of which are:

- 01/ The obligation to comply with all legal requirements and other commitments that the company undertakes and which affect its operations.
- 02/ To carry out its activities while pursuing energy improvements in its processes and optimising them according to the principle of Efficiency.
- 03/ To ensure the information and necessary resources to meet its objectives and targets are available.
- 04/ To encourage the participation of all company personnel in the design, effective implementation, operation and continuous improvement of the Energy Management System.
- 05/ To promote energy-conscious behaviour among every member of the organisation as a key value for achieving those objectives.
- 06/ To minimise the impact that energy consumption has on all its activities.
- 07/ To ensure an intelligent, efficient and responsible use of all energy resources.
- 08/ To collaborate with suppliers, contractors, and other stakeholders to establish co-ordinated actions aimed at improving energy performance.
- 09/ To prioritise the procurement of products and services based on their energy efficiency and to implement designs that enable continuous improvement in energy performance.

Based on its commitment to sustainable mining operations, the management of Atalaya Riotinto Minera assumes responsibility for implementing, documenting and maintaining an up-to-date Environmental Management System as a basic tool for the execution of the provisions established in this

Policy. Every company employee or collaborator must assume their responsibility within the Environmental Management System and incorporate environmental protection in all their actions as an integral condition of their duties.
